About me

I am a Master of Public Policy (MPP) candidate at the University of Chicago and a quantitative analyst with 9+ years of consulting experience across Latin America and the Caribbean. I build end-to-end data solutions in Python, R, SQL, and Looker Studio, from data extraction and cleaning to analysis and decision-ready reporting. I design and interpret experiments and quasi-experimental methods, including A/B tests and difference-in-differences, translating rigorous analysis into practical tools, workflows, and dashboards that improve strategy, operations, and policy outcomes.

Education

University of Chicago, Harris School of Public Policy

MASTER OF PUBLIC POLICY (MPP), CANDIDATE

Chicago, IL

Sep. 2025 – Present

- Quantitative focus with statistics, microeconomics, analytical politics, program evaluation, and causal inference
- Applied coursework using Python and R for data analysis, visualization, and experimental design

Universidad de Colima

B.A. INTERNATIONAL RELATIONS

Colima, México

- Emphasis on the Asia-Pacific region and international security

Aug. 2012 – Jun. 2016

Universidad de León

ERASMUS MUNDUS PROGRAM

León, Spain

- Coursework focused on finance and international trade

Sep. 2015 – May. 2016

Experience

DiDi Global Inc.

Mexico City

SENIOR OPERATIONS ANALYST - MATURE CITIES

Apr. 2025 – Present

- Led end-to-end marketplace operations across three key Mexican cities—overseeing a combined annual GMV of MXN 3.7 billion and managing a weekly incentives portfolio averaging MXN 4 million—optimizing trips, fulfillment rates, and user satisfaction through A/B tests and controlled experiments
- Designed, executed, and tracked supply-demand balancing tactics (incentives, targeted communications, dynamic pricing) using Python, SQL, Looker Studio, and advanced spreadsheets
- Analyzed business performance and local externalities, delivering weekly actionable insights to drive campaigns and growth
- Partnered with regional and central teams (pricing, marketing, strategy, CX) to scale local pilots and adapt best practices, responding swiftly to operational disruptions
- Produced comprehensive weekly reports for senior leadership, monitoring KPIs (daily/weekly trips, fulfillment and cancellation rates, incentive adoption, user activation and retention) and outlining short-term action plans

Datahué

Mexico City

CO-FOUNDER AND DATA ANALYST

Aug. 2023 – Present

- Developed and implemented a Monitoring, Evaluation, Accountability, and Learning (MEAL) strategy for Fundación Amparo, designing 60+ performance indicators to track and evaluate impact
- Consolidated 100+ databases into a centralized repository leveraging Python, Google Apps Script (Sheets), SQL, and Looker Studio, improving data integrity and operational efficiency
- Led a three-person team for data collection, cleaning, and reporting; translated findings into actionable recommendations for program improvement
- Collaborated with cross-functional stakeholders (operational staff, data capturers, project leaders, and executive directors) to translate data insights into actionable recommendations for ongoing program enhancement

Soy+ (soymas.la)

STRATEGY ANALYST

Mexico City

Mar. 2025 – Apr. 2025

- Aligned technology, commercial, and communications teams by translating requirements into actionable data-collection and analysis tools
- Built automated Looker Studio dashboards connected via APIs to real-time databases to track conversion rates and weekly performance
- Unified Mailchimp, Meta API, Supabase, and Vercel data into structured datasets for campaign evaluation, user segmentation, and behavior analysis
- Collaborated in the development of the backend of internal tools to ensure interoperability between systems and traceability of data used in strategic reports

C230 Consulting and Fundación IDEA

Mexico City

SENIOR ANALYST

Jan. 2021 – Mar. 2025

- Delivered eight projects across security and justice reform, monitoring and evaluation, interinstitutional coordination, process optimization, and market analysis for clients including the U.S. Department of State, SANOFI, and USAID-Chemonics
- Developed institutional-strengthening toolkits for State Attorney General Offices, leading process mapping and stakeholder engagement to improve investigative outcomes
- Created data-collection instruments for more than 80 private-sector stakeholders in Honduras and El Salvador to inform the AMEXCID Jovenes Construyendo el Futuro project
- Designed continuous improvement tools for investigative police training programs, integrating quantitative and qualitative methods to strengthen law enforcement capacity and ensure data-driven decision-making
- Authored comprehensive analyses of the Impulso Nuevo León 2022 Loan Guarantee Program, measuring pre- and post-treatment data to evaluate changes in beneficiaries' sales and employment levels
- Conducted an in-depth study on the quality of life of individuals with Atopic Dermatitis (AD) for SANOFI, utilizing interviews, surveys, and advanced data analytics to produce evidence-based recommendations for national health institutions
- Advised on best practices in agriculture, youth workforce development, and migration across El Salvador, Honduras, Guatemala, and Mexico, identifying enabling conditions and essential criteria for replicable initiatives
- Built measurement frameworks to systematically monitor recidivism in civic and criminal justice systems, empowering municipalities to track progress and improve outcomes in alternative dispute resolution mechanisms

DataCol

Colima, Mexico

FOUNDER AND DATA ANALYST

May 2020 – Jul. 2021

- Led a government-funded analytics initiative for real-time COVID-19 monitoring in Colima, building time-series visuals for infection and testing metrics
- Analyzed Google mobility datasets to inform public health strategies; delivered Python tools to the State Secretary of Health for cabinet briefings
- Assessed Facebook political advertising during the 2021 state elections, providing insights on reach, audience, and engagement

International Republican Institute

Mexico City

CONSULTANT

Aug. 2018 – Jul. 2021

- Coordinated the Security with Justice Program in five states with government, civil society, academia, and the private sector to promote ADR mechanisms
- Facilitated 30+ workshops on Restorative Justice and ADR, training 1,100+ participants at awareness and technical levels
- Collected, analyzed, and reported open data on alternative justice across 15 states, identifying best practices and improvement areas
- Managed Monitoring, Evaluation, and Learning (MEL) indicators in the DevResults and Tableau, integrating real-time insights into program planning and stakeholder reporting

Coparmex

Colima, México

COMPETITIVENESS MANAGER

Jun. 2016 – Aug. 2018

- Directed capacity-building programs on business administration, productivity, tax reforms, and labor rights for affiliated companies
- Produced research on security, justice, and economic trends to guide strategic decision-making for members and stakeholders

Key skills and competencies

- Management consulting & strategy development
- Data analytics & visualization (Python, R, SQL, Excel, Looker Studio, Power BI, Tableau)
- Dashboarding, automation, and data engineering basics (APIs, pipelines)
- Experimental and quasi-experimental methods (A/B testing, diff-in-diff)
- Strategy and operations, KPI design, and reporting
- MEAL frameworks and program evaluation
- Quantitative & qualitative research (mixed methods)
- Stakeholder management and cross-functional collaboration
